Note: Same URL as the team's ey-parthenon-2025-glp1-alcohol-market.pdf; EY updated the page. This capture records the Nov 2025 state.

Text capture via Claude (Cowork) web research, 2026-07-15. Key figures were verified against the source page that day. Formatting, images, and full article text are not preserved; use the URL above for verbatim context. Registered in sources.md.

Verified key content

- "44% of users drink less after starting GLP-1 and 82% keep those habits even after stopping treatment."
- "Only half of 18- to 34-year-olds drank alcohol in 2025, down from nearly 60% two years earlier." (Now converges with Gallup 2025.)
- "Low/no alcohol is booming, projected to grow at 13.6% CAGR (2024-29) in the US, compared to just 2.1% for traditional alcohol."
- "Among drinkers who cut back, wine shows the steepest decline - 52% reduced consumption, compared with 43% for beer and 40% for spirits."
