Verified key content

- "The percentage of U.S. adults who say they consume alcohol has fallen to 54%, the lowest by one percentage point in Gallup's nearly 90-year trend." Trajectory: 62% (2023), 58% (2024), 54% (2025).
- "the average number of drinks consumed over the past seven days is 2.8, the lowest figure Gallup has recorded since 1996".
- "A record-low 24% of drinkers say they had a drink in the past 24 hours."
- For the first time, "a majority of Americans, 53%, say drinking in moderation... is bad for one's health"; about two-thirds (66%) of 18-to-34-year-olds say so.
- 18-to-34 drinking participation: "the rate falling from 59% in 2023 to 50% today." Ages 35-54: 56%; 55+: 56%.
- Preference among drinkers: beer named most often, exceeding "the 30% who name liquor and 29% who name wine" (beer 38% per the article data table). Wine preferred by 44% of women vs 14% of men.
