Verified key content

- "Among wine drinkers who are drinking wine less frequently than they did a year or two ago, nearly half -- 47% -- cite the rising prices of the wines they like as a reason for drinking wine less often."
- Value ratings ("6" or "7" on a 7-point scale): beer 57%, spirits 54%, wine 50%. Wine loses the value-perception comparison among 21-39s.
- Gallup context cited in the release: 59% of 21-35-year-olds consumed beverage alcohol (2024) vs 72% (2001); 30% (2001) vs 65% (2024) agreed "alcohol is bad for your health."
